# Implantable Devices

---

## Product Knowledge

- Orthopedic fixation devices
- Spinal fusion and fixation devices
- Neurology and pain
- Podiatry

# Product Knowledge

## *Implantable: Orthopedic Fixation Devices – L8699*

*(This code is NOS (not otherwise specified) and should be used only if a more specific code is unavailable such as a CPT code)*

- Suture anchors
- Compression plates
- Cortical, cancellous and cannulated screws
- Fixation kits (internal)
- Bone grafts
- Allograft tissue
- Nailing systems
- Biologicals
- Joint replacement components  
(total knee, total hip, partial knee, and shoulder)

# Product Knowledge

## *Implantable: Spinal Fusion and Fixation Devices – L8699*

*(This code used is NOS (not otherwise specified) should be used only if a more specific code is unavailable such as a CPT code)*

- Fusion cages
- Spinal stabilization rods
- Pedicle screws
- Bone fixation plates
- Allograft bone
- Spinal locking caps
- Radio frequency probes
- Biologicals
- Spinal fusion

# Product Knowledge

*Implantable: Neurology and Pain – L8680, L8688*

- Spinal cord stimulators
- Implantable infusion pumps
- Deep brain stimulators
- Radio frequency probes

## **Trial Period**

Prior to implant of the spinal cord stimulator (SCS), the injured worker must undergo a trial period for a few days to a few weeks

- Phases of treatment
  - Trial
  - Permanent
  - Replacement
  - Lead revision

# Product Knowledge

---

## *Implantable: Podiatry*

- Sinus tarsi implants
- Subtalar implants
- Bone graft plug implants
- Toe implants
- Resorbable fixation pins (internal fixation)
- Preformed implantable bone wedges
- Fusion plate and screws
- Compression pins
